LOGISTICS AND MANAGEMENT SERVICES

CALIBRE
Our Success Follows Yours®

CALIBRE Systems, Inc. CALIBRE Systems, Inc. is an employee-owned management consulting and digital transformation company supporting government and commercial clients since 1989. Since inception, CALIBRE has provided logistics and acquisitions communities with tailored, integrated, and adaptable solutions, equipping organizations with a comprehensive picture of operations, and enabling advanced analytics capabilities across all levels.

DEEP EXPERTISE

Advanced Logistics Analytics
CALIBRE provides organizations with an in-depth understanding of their complex logistics services by supplying actionable information drawn from multiple data sources. We employ focused analytics, management views, and data integration to identify and resolve today's high-cost logistics problems.

CALIBRE's engineering analysis reduces risk with weapons systems affordability and sustainability, and achieves system availability targets.

Integrated Logistics Information Systems
CALIBRE provides organizations around the world with immediate access to integrated, actionable logistics data. We offer logistics business intelligence, dashboard development services, and large-scale data integration to create a quick and secure view of the logistics environment.

CALIBRE uses Agile to develop solutions that reduce time, improve project outcomes, and enhance user experiences.

Logistics and Acquisition Training
CALIBRE employs solutions to identify Federal Acquisition Regulation compliance risks, prepare corrective action plans, and track remediation activities.

CALIBRE's solutions provide clarity to acquisition logistics policy, reliability growth requirements, and lifecycle cost reduction.

DEMONSTRATED IMPACT

Combined Joint Task Force – Operation Inherent Resolve (CJTF-OIR) C/J-4: Business Intelligence Sustainment Readiness Tool (SRT)
CALIBRE developed a business intelligence tool that provides near real-time visibility of financial and logistics data as a solutions concept to manage equipment readiness, supply chain processes, property accountability, and financial reconciliation across Army Commands. The SRT utilizes the Army's systems of record and enables the logistics staff to streamline reporting, dashboarding, and decision making. The financial reconciliation work enabled the CJTF-OIR to identify over $40M in deobligations and successfully recoup over $30 million within the past three years.

Logistics Data Analysis Center (LDAC), Logistics Support Activity Information Technology Systems (LITeS)
CALIBRE supported and continues to support integration, engineering, and technology evaluation efforts for Logistics Information Warehouse (LIW)/ Forward as well as for LDAC's in-house LIW-related systems. As part of LDAC's LIW Integration team, we work to merge multiple Army logistics data systems and produce the Army's authoritative data warehouse under the new Army Enterprise Portal.

Office of the Deputy Assistant Secretary of the Army for Cost and Economics (DASA-CE): Operations and Support Management Information System (OSMIS)
For DASA-CE, CALIBRE developed and maintains a comprehensive integrated O&S system that tracks information for over 1,700 major Army weapons/ materiel systems. OSMIS is built using information provided from existing data sources and uses disparate force structure and logistics databases together to present a holistic view of O&S cost data at the unit, weapon system, and individual repair part level of data.
